FLIGHT REVIEW

Dear Fellow Pilot,

Welcome to the *Flight Review* (formerly known as the biennial flight review). I thank you for the opportunity to earn your business. This flight review outline will help you not only accomplish the objective required by the Federal Aviation Regulations, but also help review areas most likely to cause aviation accidents. It is an opportunity for you to review weak areas in aeronautical knowledge and skill, and help you accomplish your aviation goals, all while becoming a safer, more competent pilot.

As you are most likely aware the flight review is required every 24 calendar months by Federal Aviation Regulations for all pilots who intend to act as pilot-in-command (PIC) of an aircraft. (FAR 61.56) The review is a *proficiency evaluation* designed to be accomplished in an *economical and expeditious manner* while providing a learning experience. (Advisory Circular 61-98A) It is NOT A CHECKRIDE per se, however for 'satisfactory completion of the review you will need to demonstrate competency to the level of the certificate you hold. The standards for your level of certification can by found in the *Practical Test Standards* publication, available to download at www.faa.gov.. Please note that during the review attention will be focused on items, referred to as "special emphasis areas" as noted in the beginning of the PTS (i.e. checklist usage).

While FAR 61.56 states the minimum flight time required for a flight review, understand that the actual amount will vary based on how regularly a pilot flies.

Attached is a training syllabus consisting of some preparation items I'd ask you to complete prior to our meeting. You will notice that this style of review is a bit more indepth than reviews you may have previously done. This is to ensure that all areas of operations are comprehensively covered. I've enclosed an open-book study guide review of the regulations, and a checklist. I will cover the items listed on the checklist, as well as any additional areas you would like to review. I've also attached a *Pilot Aeronautical History* form which I would ask that you complete and return to me as soon as possible. This will help me to assess your experience so that we can custom-tailor a flight review specifically for you.

My intent is not only to keep you safe and knowledgeable while exercising the privileges of your certificate, but also provide you an opportunity to learn something and most importantly, HAVE FUN! Your support will make this an enjoyable experience!

FLIGHT REVIEW CHECKLIST

Step 1: Preparation (to be completed by the Pilot prior to the review)

- Pilot's Aeronautical History (complete and return ASAP)
- Flight Review Regulations Worksheet (open-book)
- Flight Review Preparation Course (www.faasafety.gov)
- AOPA Online Interactive Safety Courses (www.aopa.org/asf/)
- Cross-Country Flight Plan Assignment (for assistance use attached checklist)

Step 2: Ground Review (completed with CFI prior to flight)

- Regulatory Review
- Cross-Country Flight Plan Review
 - Weather & Weather Decision-Making
 - o Risk Management & Personal Minimums
- General Aviation Security Issues

Step 3: Flight Activities (taken from Private or Commercial PTS)

- Physical Airplane (basic skills)
- Mental Airplane (systems knowledge)
- Aeronautical Decision-Making (ADM)

Step 4: Postflight Discussion

- · Replay, Reflect, Reconstruct, Redirect
- Questions

Step 5: Aeronautical Health Maintenance & Improvement Plan

- Personal Minimums Checklist
- Personal Proficiency Practice Plan
- Training Plan (if desired)

STEP 1: PREPARATION

PLEASE COMPLETE THE FOLLOWING PRIOR TO THE FLIGHT REVIEW

Completing these items ahead-of-time will assist you in accomplishing the requirements of FAR 61.56, as it relates to ground portion of the flight review. It will help you identify any strong areas, as well as help remind of you some things you may have not used for a while and may need some work on. It will also serve as a more economical means of covering the required material, rather than one-on-one with a CFI.

- 1. Complete the *Flight Review Regulations Worksheet* and bring to the review. This is an open-book worksheet in which you may use the FAR/AIM. Make sure you have a current copy!
- Complete the Flight Review Preparation Course at www.faasafety.gov and bring the certificate of completion. This will be a scenario-based review of the regulations. Included is a pre-test which, if successfully completed will bypass the material and take you straight to a certificate of completion.
 - "Flight Review Prep Guide" faasafety.gov>learningcenter>online courses>flight review prep guide
- 3. Do the following free online interactive safety courses from AOPA. Print and bring the certificates of completion with you. (Note: Completion time may vary from 15-60 minutes, depending on knowledge level). Completion of these courses also counts towards completion of the FAA Wings program.
 - "Runway Safety" <u>http://flash.aopa.org/asf/runwaysafety/</u>
 - "Weather Wise: Ceiling and Visibility" http://flash.aopa.org/asf/wxwise_ceilingvis/
- 4. Plan a VFR Cross-country as previously specified by the instructor. This will be a short cross-country (30-50 miles) with one leg focused on cross-country procedures and the other focused on flight maneuvers. In your planning be sure to do the following:
 - Complete a navigation log. This may be done manually using an electronic flight computer or E-6B (whiz wheel), or using an online fight planning source. (i.e. DUAT's, AOPA, etc.)
 - Fill out a flight plan form (you do file a flight plan every time, right?)
 - Obtain a standard weather briefing (what different ways can you do it?)
 - Obtain information such as runway lengths, available lighting, radio aids to navigation, traffic delays, NOTAM's, TFR's, etc. (Where is this found?)
 - Calculate takeoff, climb, cruise, and landing performance based on real-time weather for the day of the flight. (How much runway are we going to use?)
 - Calculate weight and balance using actual aircraft data. (I weigh 180 lbs.)

FLIGHT REVIEW REGULATIONS WORKSHEET

This is an open-book worksheet. Answers can be found in the current FAR/AIM. It is NOT a pass/fail test.

1.	(61.3) Which three documents are required to be in your personal possession when
	you are acting as PIC of an aircraft?
2.	(61.23). If you are under 40 and you have a third class medical, how long is your
	medical good for?
3.	(61.23) If you are over 40, and you have a third class medical, how long is your
	medical good for?
4.	(61.57) What are the currency requirements to act as PIC of an aircraft during the
	day?
5.	(61.57) At night?
6.	(61.57) For the purpose of night currency, when must night landings be performed?
7.	(91.3) The of an aircraft is directly
	responsible for, and is the final authority as to the operation of that aircraft. The Pilot
	in Command may deviate from any rule to the extent to meet an
8.	(91.123) When an ATC clearance has been obtained, no pilot in command may
	deviate from that clearance unless:
	a
	b
	c
9.	(91.123) Each pilot who is given priority by ATC in an emergency, shall submit a
	detailed report of that emergency within to the manager of that ATC
	facility, by ATC.
10.	(91.103) What information is a pilot legally required to become familiar before each
	flight, and any flight not in the vicinity of the airport?

11. (91.107) No pilot may cause to be moved on the,, or
an aircraft, unless the Pilot in Command of that aircraft ensures that
each person on board has been notified to fasten and is using his/her
and, if installed,
12. (91.105) What are the requirements for crewmembers regarding seatbelts and should harnesses?
13. (91.13) No person may operate an aircraft in a or or manner so as to endanger the life or property of another.
14. (91.15) May the Pilot in Command of a civil aircraft <i>allow any object to be dropped</i> from the aircraft? Why or Why Not?
15. (91.17) No person may act or attempt to act as crewmember of an aircraft within hours of alcoholic consumption or while having a % blood alcohol level or while or while using any

- Prepared for diversion (money, accommodations)?
- Time pressures (e.g. "must be at work" issues)?

FLIGHT ACTIVITIES

The flight portion of the review will consist of selected areas of operation listed below:

AREA OF OPERATION (from Private PTS)

I. PREFLIGHT PREPARATION

- A. Weather Information
- B. Cross-Country Flight Planning
- F. Performance and Limitations
- G. Operation of Systems

II. PREFLIGHT PROCEDURES

- A. Preflight Inspections
- B. Cockpit Management
- F. Before Takeoff Check

III. AIRPORT OPERATIONS

- A. Radio Communications
- C. Airport, Runway, Taxiway Signs, Markings & Lighting

IV. TAKEOFFS, LANDINGS, AND GO-AROUNDS

- A. Normal and Crosswind Takeoff and Climb
- B. Normal and Crosswind Approach and Landing
- C. Soft-Field Takeoff and Climb
- D. Soft-Field Approach and Landing
- E. Short-Field Takeoff and Climb
- F. Short-Field Approach and Landing
- L. Go-Around/Rejected Landing

V. PERFORMANCE MANEUVER

A. Steep Turns

VI. NAVIGATION

- A. Pilotage and Dead Reckoning
- B. Navigation Systems & Radar Services
- C. Diversion
- D. Lost Procedures

VIII. SLOW FLIGHT AND STALLS

- A. Maneuvering During Slow Flight
- B. Power-Off Stalls
- C. Power-On Stalls
- D. Spin Awareness

IX. BASIC INSTRUMENT MANEUVERS

- A. Straight and Level Flight
- D. Turns to Headings
- E. Recovery from Unusual Flight Attitudes
- F. Radio Communications/Navigation Systems

X. EMERGENCY OPERATIONS

- A. Emergency Approach and Landing
- **B.** Systems and Equipment Malfunctions

XI. POSTFLIGHT PROCEDURES

A. After Landing, Parking, Securing
