

# STEP INTO ECOLOGY WITH BOTH FEET!

Introducing PPV\*.  
The light 'n lively fun  
machine that runs on  
**Pedal-Power.**  
No noise. No smoke.  
No sweat.

Now you can do your part for ecology . . . and have fun doing it! PPV, the "People-Powered Vehicle," is the latest ecological answer to clean, quiet and economical short-range transportation. You can use

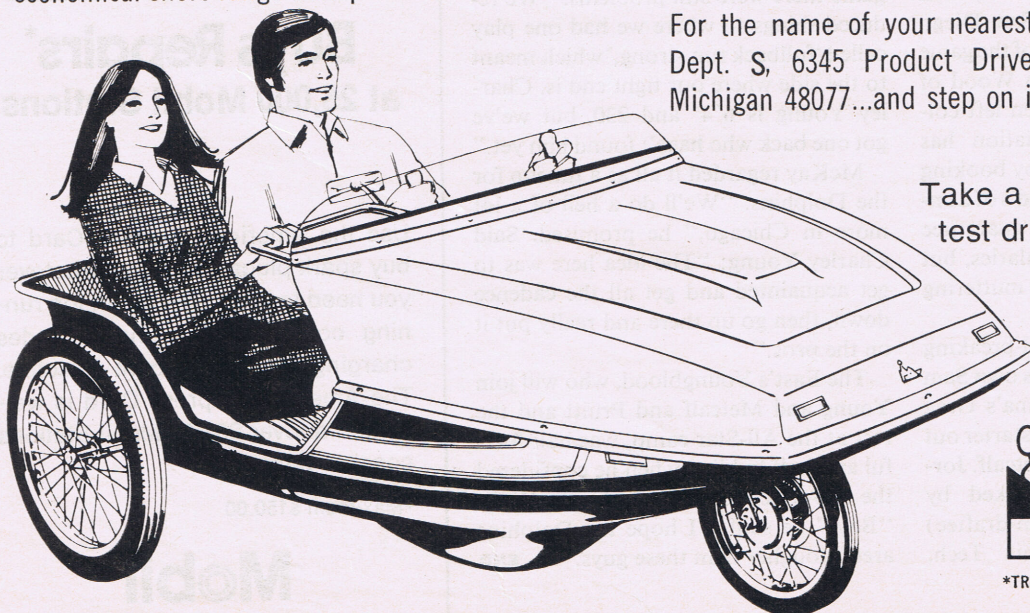

this beautifully styled, three-wheeled vehicle for school or campus commuting, shopping, work, or just plain healthy fun and recreation.

Its exclusive "shift-anytime" Mark III transmission takes the work out of pedaling. The adjustable custom-contoured bucket seats add real comfort . . . as well as back support to your pedaling action. And PPV can be stored in an upright position, taking up less than half its normal floor space.

The lower bodies come in your choice of Deep Forest Green, Royal Space Blue and Polar Sun Yellow. The body hood and shifter cover are Bright Snow White.

So drive one of the few vehicles that meets every emission requirement . . . PPV.

For the name of your nearest dealer, write EVI, Dept. S, 6345 Product Drive, Sterling Heights, Michigan 48077...and step on it!

Take a Pedal-Powered  
test drive for the good  
clean fun of it!
